In the last two years, “AristocraticA” for some concerts, works with the collaboration of **Mauro Sabbione**, historical keyboardist of the Matia, to whom we owe all the production of the electronic period.

The choice to reproduce the songs of the **Matia Bazar**,
was inspired by their own characters.

The works offered by “AristocraticA” range from the melodic talent of the 70’s, passing through the electronic popularity of the 80’s, to the most recent works.

The group, which for many years has the ability to create melodies that are never boring, have the courage to change their face with the help of innovative solutions !!
